Henzel Studio

In ‘Le Météore de la Nuit’, Calle Henzel unveils a series of monumental handmade rug designs, each meticulously crafted in his distinctive style. Central to Henzel’s oeuvre is the concept of balance and the principles of physics, inviting viewers to reflect on the intricate interplay between science and art.

Utilizing innovative free-form techniques with precisely cut wool, mohair, and silk at varying levels, each rug embodies Henzel’s refined artistic language developed over three decades. His organic aesthetic is characterized by architectural lines and abstract forms shaped by the laws of gravity, standing as testaments to his unique ability to intertwine art, science, and philosophy in a profound manner.

Henzel’s creations serve dual purposes, suitable for both floor coverings and wall sculptures, all custom-made to clients’ specific measurements.
