

Ceto Pendant Light

Ross Gardam

Ceto captures the variation and rippling of the surface of the ocean. The collection explores the deep relationship between light and the ocean in a range of mesmerising luminaires. Each piece reflects a distinct pattern emitting a delicate luminosity, which embodies the presence of the sea and the power within its undulating movements.

Sculptural and captivating all at once, Ceto's silhouette is a result of a series of experimentations with traditional optic glass blowing techniques and innovative engineering. Through the process of blowing, each light achieves its unique glass effect.

The Ceto Pendant Light is a sculpture in its own right. The single light
