

Copper Adit by Fernando Mastrangelo

Henzel Studio

Drawing from the visual language of extraction landscapes, Fernando Mastrangelo develops a new work for Atelier Bowy C.D., part of Henzel Studio, created within The Atelier Editions program. The project translates the geological logic of mineral landscapes into textile form, compressing processes of erosion, sedimentation and excavation into a woven surface.

Official launch at Museo Nazionale Scienza e Tecnologia Leonardo da Vinci within the historic spaces of Le Cavallerizze, during Milan Design Week.
