

Crystalline Dijon

Henzel Studio

The artistic and organic process of Calle Henzel has been the driving force in the development of Henzel Studio's designs. He has over the years in an uncompromised fashion challenged the traditional conventions of subject matter, shape, finishings and special treatments as a result of painstaking research that includes vintage treatments, intricate surface compositions and even natural erosion – methodologies that further blur the distinction between art and design.

Calle Henzel has collaborated with some of the most prominent names and foundations in contemporary art. His designs has been exhibited at prominent venues such as MOCA, Katonah Museum of Art, Boca Raton Museum of Art, Rossana Orlandi Gallery and The Goss-Michael Foundation.
