

Luna A Disc Sconce

Gabriel Scott

A soft interplay between full and half-full shapes, the Luna A Disc Sconce embodies a glamorous reference to the moon's diffused light. This Sconce is available in black hardware with smoked glass or brass hardware with bronze glass.

Inspired by a lunar halo, the elegant shapes of mouth-blown glass reference the moon's diffused light and soft glow. The Luna A Disc Sconce is one of eight lighting fixtures in the Luna A-series based on the coveted design of the existing Luna light.
