

Luna A Small Sconce

Gabriel Scott

Bold and striking in its design, the Luna A Small Sconce has been produced to satisfy the demand for a more affordable range of architectural lighting products.

Hotels often specify our lighting fixtures but it might be a large-scale signature piece for a lobby or reception area. The Luna A series can be featured in corridors or hotel rooms and of course, can be used in residential projects too. They make a statement in whatever space they might find themselves.
