

Myriad Chandelier 7 Vertical

Gabriel Scott

The Myriad Chandelier, 7 Vertical comprises seven beautiful double-blown glass modules with a choice of metal hardware options to create a stunning centrepiece for any residential or hospitality design application.

Combining alabaster white glass and metal hardware, the sculptural Myriad Vertical Chandelier blends strong articulated arms with a warm diffusion of light, resembling an arboreal feel.

The Myriad Vertical Chandelier is made by Gabriel Scott's in house expert team in their 30,000 sq ft Montreal studio. Made by hand to order, the studio's lighting collection is easily customizable and we're happy to explore new possibilities so please get in touch to discuss.
