

Nausta (Taupe Edit)

Henzel Studio

Calle Henzel stands as a trailblazer in the realm of organic, free-form shaped rugs, with his groundbreaking, award-winning Frozen Cut collections renowned for their distinctive shapes and innovative aesthetics. Henzel was the first designer to introduce such collections, effectively setting a new standard within the industry. His pioneering work is the culmination of a meticulous decade-long scientific experiment, during which rugs were exposed to the harsh environmental elements of Northern Sweden.

This rigorous process enabled Henzel to draw inspiration from natural phenomena such as erosion, the thawing of snow, and seasonal germination, observing how these elements affected the rugs.
