

Tapete Lençois by Fernanda Marques

Henzel Studio

Unfolding from the shifting landscape of the Lençóis Maranhenses, architect and designer Fernanda Marques introduces a new rug created for Atelier Bowy C.D., part of Henzel Studio, and included in The Atelier Editions program. The work is presented during Milan Design Week at Museo Nazionale Scienza e Tecnologia Leonardo da Vinci within the historic spaces of Le Cavallerizze.

The project begins with a landscape rather than a drawing. In Lençóis Maranhenses, wind continuously reshapes the dunes, water gathers between the sand formations, and light alters the surface throughout the day. Forms appear and dissolve. Edges soften. What seems fixed is in constant transformation.
