Place offers the most functional, modular platform to **connect, experience** and **create**.

At the heart of the collection is the desire to bring people together. To support creativity in an environment which is smart, agile and intuitive.

The Place collection of lounges and accessories blurs the line between residential and commercial space. Offering exceptional comfort and soft styling balanced with work-focused functionality and proportions.

Place allows you to create focused working spaces, then easily reconfigure to suit your next task or meeting.

01 DETAILS

A highly refined level of craftsmanship is displayed in the stitch and seam details of each element.

02 DETAILS

Place has a softness to every detail, both aesthetically and physically. Shown here in the curvature of the arms and the junction where elements meet.

Simple elements join together to create unique configurations.

03 DETAILS

Each individual seat unit locks together via a detachable joiner bracket located to the lounge underside, with the backs zipping together to create a more permanent configuration.

Longer elements create more permanent and expansive configurations.

04 MODULARITY

Longer elements can be joined to smaller ones or used as alternatives to single elements for more permanent configurations.

05 DETAILS

Junctions between elements create a soft appearance while seat pull-downs and fine stitch details help define a meticulous attention to detail.

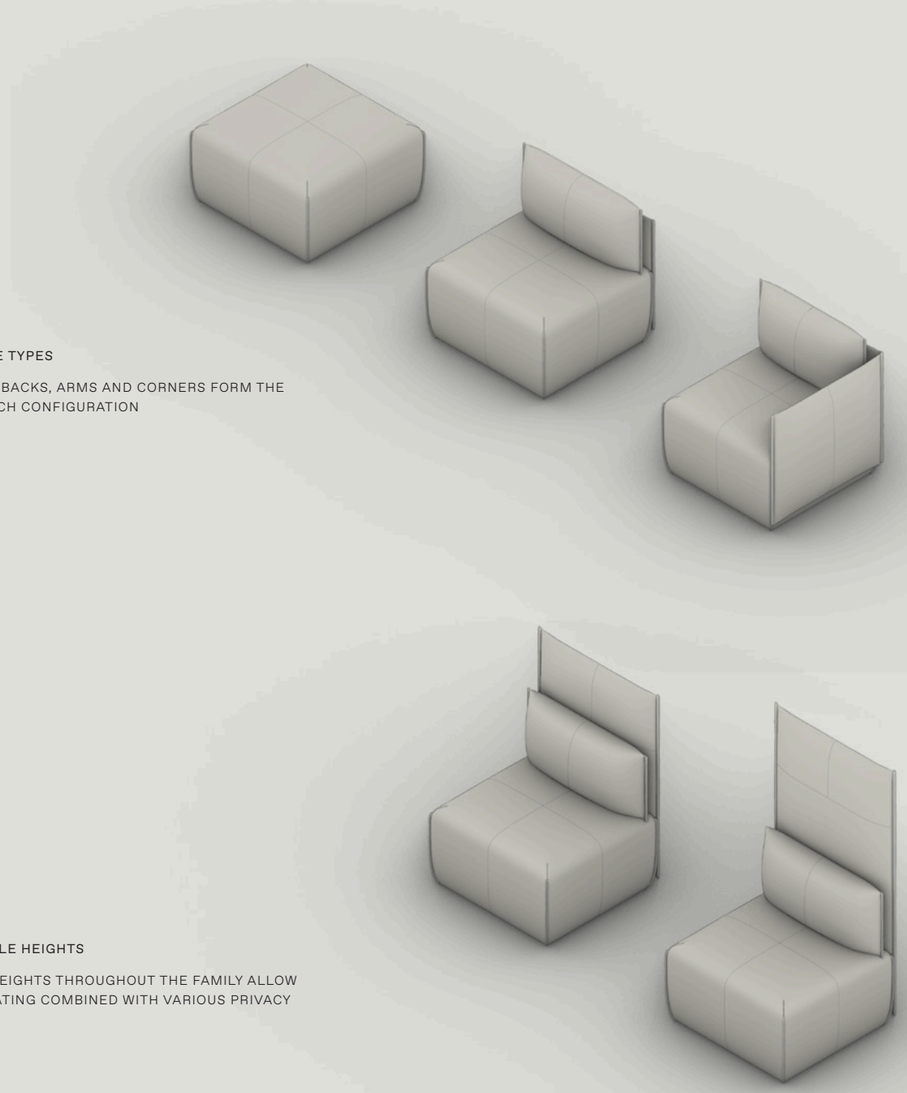

06 VARIATIONS

Arc elements combine classic rectangular lounge lengths with curved ends to create softer and more intimate lounges.

MODULARITY 01

Place is endlessly modular with ottomans, lounges, arms and backs all designed to fit the needs of any space across numerous functions.

Multiple back and arm heights provide varying levels of privacy, from casual to full privacy spaces. Curved units provide circular meeting spaces and organic floorplan layouts while longer units enable more permanent configurations.
