# Carlo Nason

Originally designed in the 1960s, Medusa by Carlo Nason is a sculptural glass lamp that embodies the poetic experimentation of Italian modernism. Redeveloped by Established & Sons, the design brings Nason's expressive approach to form and light into a contemporary context, while remaining faithful to its original spirit.

Medusa is defined by its fluid, hand-blown glass diffuser, whose softly undulating profile emphasises its natural sense of movement. The layered glass construction gently encloses the light source, producing a warm, atmospheric glow that is both diffused and richly dimensional. Subtle variations in the glass make each piece unique, celebrating the mastery of traditional Murano craftsmanship.

THE DESIGNER

Carlo Nason is one of Italy's most prolific and revered lighting designers. Born to a rich lineage of Murano glass factory owners, he was actively involved in the process of glass blowing from a very young age. Nason's auspicious upbringing led him to becoming a prominent figure in the golden age of Italian design, melding historical Murano techniques with design movements of the post-war avant-garde. Nason's body of work shows influences from Space Age design beautifully combined with hints of Art Deco. His collections encompass lamps, vases, and sculptures mouthblown in Murano, where he continues to live in retirement. His works are in the collections of the internationally renowned Corning Museum of Glass, and The Museum of Modern Art in New York.
